Marlin: Cover. Sprint. Persist.

[ARCHIMEDES LOGO]

A 60-second film for Coast Guard and DHS counter-drug operators. It opens on a miss they know: a go-fast that has been found but that nobody can reach. Then it shows the same picture with a fleet of Marlins on station. The nearest two close in under 30 minutes and stay on it, while the rest keep the approaches covered.

AUDIENCE

Coast Guard and DHS operators, watchstanders and program staff working counter-drug in the Caribbean. A narrow, expert audience: every frame has to ring true to people who do this job.

OBJECTIVE

Viewers recognize the miss and leave with one idea: a fleet of Marlins on station closes the coverage gaps. The gain is shown, not claimed.

CORE MESSAGE

Today a go-fast can be found and still be out of everyone's reach. Twenty Marlins loitering at sea put eyes on within 30 minutes, stay on it until partners arrive, and keep the rest of the approaches covered.

TONE & SOUND

Emergency, a sinking beat, relief, then action. Show, don't tell: no VO for the first 23 seconds, 20 words in all. Score carries Act 1; real engine and water audio throughout.

STRUCTURE · 60 SECONDS · 12 SHOTS

Act 1 · The miss
0:00–0:16 · shots 1–4

Act 2 · Marlin
0:16–0:46 · shots 5–10

Act 3 · Coverage holds
0:46–1:00 · shots 11–12

VOICEOVER · 20 WORDS

0:00–0:23	No VO. Score, outboards, radar, aircraft, console tones.
0:23	*“The nearest two close fifty miles in thirty minutes,”*
0:42	*“and stay on it until partners arrive.”*
0:52	*“Cover. Sprint. Persist.”*
0:56	*[pause] “Marlin.”*

SUPERS, VESSEL LEVEL
01 CLOSE (0:23) · 02 EYES ON (0:40) · 03 SURVEIL (0:42)

CLEARANCE BEFORE RELEASE

Performance claims. “50 nm in 30 minutes” (about 100 kt sustained) and hull-borne shadowing need test data or a “design target” caption.

Government marks. Asset types only (MPA, CUTTER, USV). No seals, unit names, hull numbers or agency colors. Marlin in defense gray.

Sensors and sources. Generic radar and infrared depictions: no models, bands or ranges. The intelligence cue appears only as a search box: no sources or methods. ITAR/EAR review of script and final cut.

Geography. Stylized coastline only. No real map, place names, routes or patrol areas.

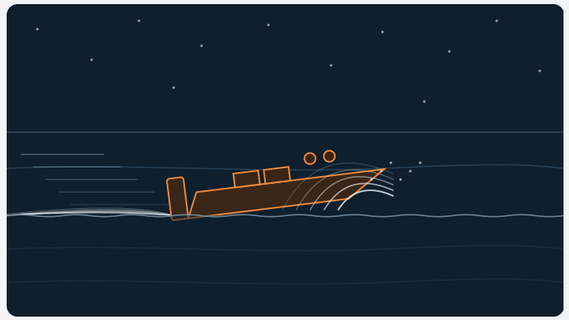

Law enforcement. Marlin closes, gets eyes on and surveils; partners make the stop. No use of force, and no “target acquired” or lock-on language.

Third-party look. Station-keeping markers use a generic style: no other company's UI, logos or vessel likenesses.

ACT 1 · 0:00–0:16

The miss

Fast and urgent, in the order it really happens: radar finds a return, the camera confirms it. Then the moment every operator knows: we can see it, and no one can get to it.

01 · The boat 0:00–0:04

VISUAL

Night, open sea. A low go-fast runs flat out with no lights, spray sheeting off the bow, bales lashed down, men hunched behind the console. Tight and moving with it.

VO

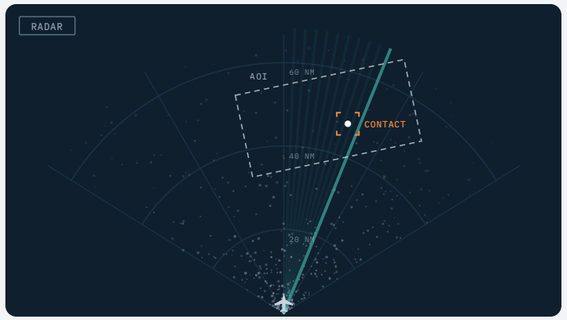

None.

ON SCREEN

None.

SOUND

Hard pulse score from frame one; outboards screaming.

02 · Aircraft radar 0:04–0:07

VISUAL

Hard cut to the patrol aircraft's sea-search radar. The sweep paints sea clutter inside a dashed search box, a quiet hint that the crew was cued to this area. One faint return holds sweep after sweep; the operator hooks it.

VO

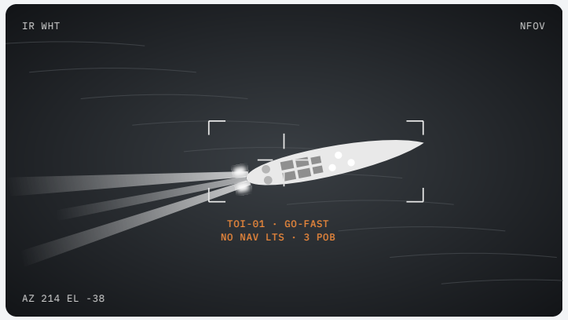

None.

ON SCREEN

Dashed search box (AOI). Hook brackets and “CONTACT” on the return.

SOUND

Radar sweep tone; muffled aircraft drone; the score tightens.

03 · Infrared ID 0:07–0:10

VISUAL

The aircraft's infrared camera slews onto the contact: a white-hot go-fast, twin wakes, bales on deck. Positive ID.

VO

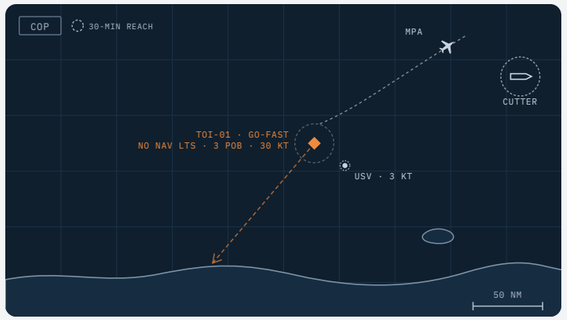

None.

ON SCREEN

Sensor overlay. Tag “TOI-01 · GO-FAST / NO NAV LTS · 3 POB”.

SOUND

Sensor servo whir; outboards under the score.

04 · Out of reach 0:10–0:16

VISUAL

Pull back to the common operational picture: stylized coastline, open water, scale bar. The aircraft orbits the contact. The cutter is far offshore and the USV close but slow; neither reach ring comes near. The aircraft breaks off for home, and the track turns dashed, projected on its last course to the coast.

VO

None.

ON SCREEN

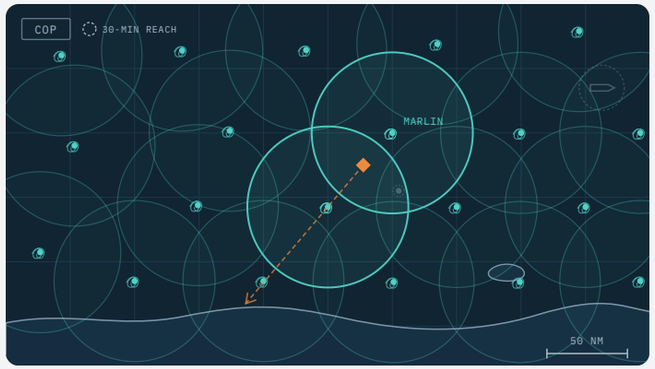

“TOI-01 · GO-FAST / NO NAV LTS · 3 POB · 30 KT”. Asset types only; surface assets carry 30-minute reach rings.

SOUND

Console tones; the score drops to silence as the track goes dashed.

Marlin: on station

Relief. The fleet was already out there. Same picture, no cut, and the boat is running straight at one of them.

05 · On station 0:16–0:20

VISUAL

Same display. Twenty Marlin markers blink on across open water, each with the tight looping trail of a vessel holding station, a look operators already know from uncrewed survey vessels. Their 30-minute rings tile the approaches. The go-fast's projected track runs straight at one Marlin; a second sits off its flank.

VO

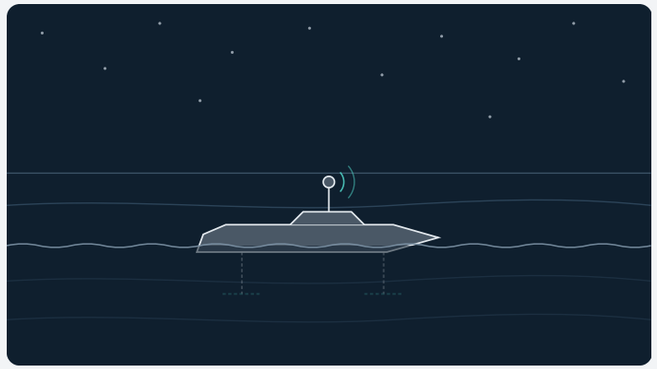

None.

ON SCREEN

Marlin markers and rings only.

SOUND

One held tone in the silence, then the score starts to rebuild.

06 · Loiter 0:20–0:23

VISUAL

Open ocean, night, long swell. A defense-gray Marlin sits hull-borne, alone, sensor mast turning. It has been out here for days.

VO

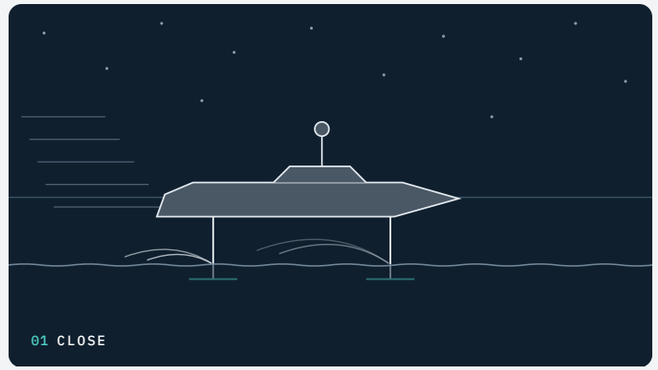

None.

ON SCREEN

None.

SOUND

Water and wind; the score's pulse returns underneath.

07 · Lift 0:23–0:28

VISUAL

Camera at the waterline. The Marlin spools up, climbs onto its foils and the spray falls away. It is out of frame in seconds.

VO

“The nearest two close fifty miles in thirty minutes,”

ON SCREEN

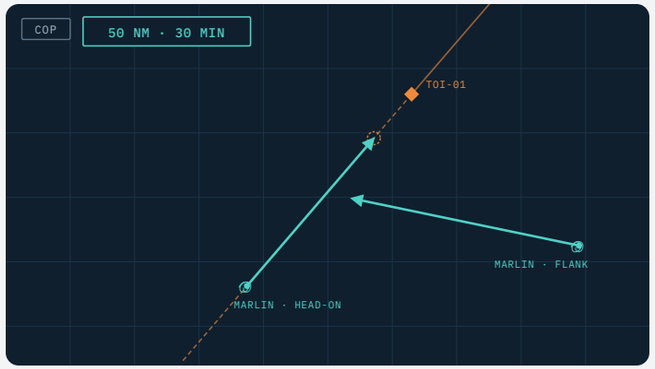

Super “01 CLOSE”.

SOUND

Engine spools to a full roar; the score kicks in on the lift.

Marlin: the close

The “that's cool” moment: speed you can feel, then the discipline of sitting on the target until help arrives.

08 · Converge 0:28–0:34

VISUAL

Back on the display, tight. The Marlin ahead runs straight up the projected track at the boat: the shortest path, closing head-on. The second angles in from the flank to a point beside the track, ready if the boat turns for another landing.

VO

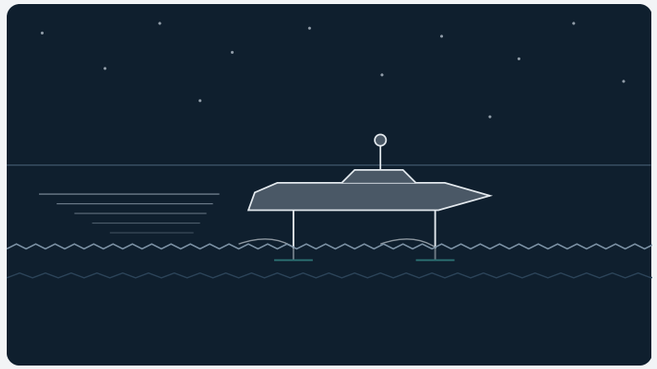

(Line continues.)

ON SCREEN

Readout “50 NM · 30 MIN”.

SOUND

Driving score; a data tone on each track update.

09 · The run 0:34–0:40

VISUAL

Drone tracking shot alongside a Marlin flying level over night chop, hull clear of the water and steady as the sea builds.

VO

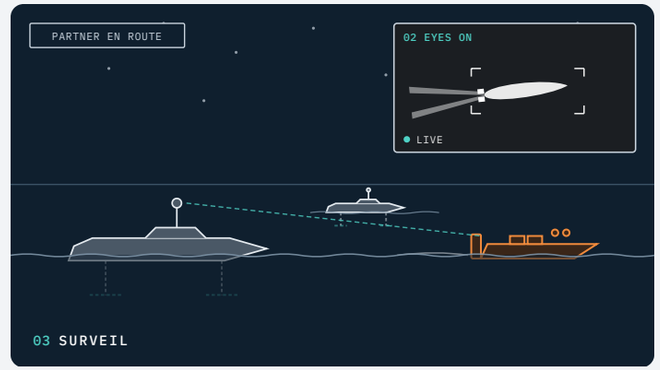

None.

ON SCREEN

None.

SOUND

Full engine roar, wind buffeting the mic.

10 · Eyes on 0:40–0:46

VISUAL

Cut to Marlin's own infrared view: the go-fast, white-hot, the same look as shot 03. Pull out: the Marlin comes about, drops off its foils and settles hull-borne at standoff, pacing the boat, with the second Marlin holding its flank. On the display, a partner track appears, inbound.

VO

“and stay on it until partners arrive.”

ON SCREEN

Super “02 EYES ON” on the infrared view, then “03 SURVEIL”. Inset “● LIVE”. Tag “PARTNER EN ROUTE”.

SOUND

Engine drops to a hull-borne rumble; hull slap; distant, unintelligible radio.

Coverage holds

Pull back: two boats committed, the fleet re-spaces, the approaches still fully covered. Land the tagline, pause, land the name.

11 · The fleet 0:46–0:56

VISUAL

Pull back to the full display, framed exactly like shot 04 so the difference reads instantly. Two Marlins hold the boat. The fleet re-spaces around the gap: five nearby Marlins slide over and the rings re-tile with no holes. Eighteen still cover all of the approaches.

VO

“Cover. Sprint. Persist.”

ON SCREEN

Short arrows on the five Marlins as they shift. The three words land one per beat over the map.

SOUND

Score broadens and resolves; three hits on the three words.

12 · End card 0:56–1:00

VISUAL

Hard cut to navy. A beat of silence, then the logo and product name land.

VO

[pause] “Marlin.”

ON SCREEN

[ARCHIMEDES LOGO] · MARLIN · Cover. Sprint. Persist. · [DEMO REQUEST / CONTACT] · small-print performance disclaimer.

SOUND

Single engine rev to black.

ON-SCREEN LANGUAGE

Use

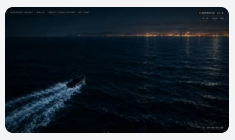

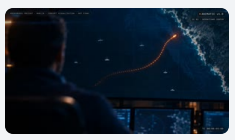

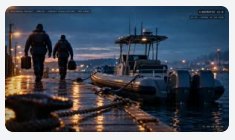

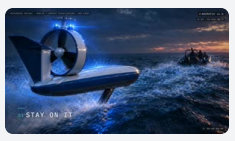

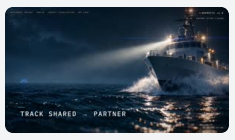

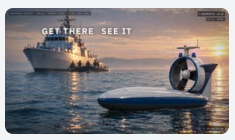

TOI · GO-FAST · NO NAV LTS · POB · KT · NM · ON STATION · EYES ON · PARTNER EN ROUTE

Avoid

TARGET ACQUIRED · LOCK · ENGAGE · CUSTODY (for a track) · RESPONDENTS

Fixes for the next cut

Everything that changes from Arch_Promo_Draft_v1.mp4 and its script. Timecodes refer to the v1 draft; shot numbers refer to this storyboard.

#	V1 DRAFT	TIME	ISSUE IN V1	FIX	FROM
01		0:00–0:03	Opens on a wide, slow shot with harbor lights on the horizon. Reads as port security, not open-ocean counter-drug.	Tight, moving shot of the go-fast at night, open ocean, no coastline (shot 01).	Team
02		0:04–0:06	Generic operator watching a screen. Not how go-fasts are actually found.	Aircraft radar return inside a cued search box, then infrared ID (shots 02–03).	Research
03		0:07–0:13	About 7 s of crew walking to a RHIB, then the RHIB in heavy seas. Slow, and the miss is never shown.	Cut. The miss plays out on the tactical display: assets out of reach, aircraft heads home (shot 04).	Team
04		0:14–0:18	Marlin first seen moored at a lit pier, implying a launch from port.	Marlin pre-positioned and loitering hull-borne at sea (shots 05–06).	Joo Sub
05		0:14–0:54	**Color scheme.** Police-style white and blue hull with a blue light bar and strobes.	Defense gray. No light bar, strobes or agency colors.	Joo Sub, Team
06		0:19–0:21	“MARLIN” title card mid-film over a sunset stops the action.	Name lands once, on the end card, after the tagline.	Team
07		0:22–0:27	Spec callout “UP TO 150 KT*”, and supers “GET THERE / SEE IT / STAY ON IT”.	Outcome readout “50 NM · 30 MIN”. Supers “01 CLOSE · 02 EYES ON · 03 SURVEIL”.	Team
08		0:36–0:41	**Shadowing state.** Marlin shown foil-borne right alongside the target.	Hull-borne at standoff while shadowing (target under 40 kt). Foil-borne only in transit (shots 07–10).	Joo Sub
09		0:42–0:52	Handoff scene: cutter with searchlight, “TRACK SHARED → PARTNER”, Marlin idling beside it.	No handoff. “PARTNER EN ROUTE” tag, then pull back to the fleet still covering the approaches (shots 10–11).	Team
10		0:19–0:54	**Continuity.** Time of day jumps: night, sunset, day, dusk, night, sunset.	One continuous night from first frame to the end card.	Review
11		0:14–0:54	**No fleet.** One Marlin and one target throughout, so the value reads as a single fast boat.	Fleet on the tactical display: 20 on station, two commit, the rest re-space. Coverage is shown, not claimed (shots 05, 11).	Team
12	SCRIPT	Script	**Voiceover.** About 80 words covering two missions (port security and counter-drug).	20 words, one mission, no VO until 0:23. Supers carry Close · Eyes on · Surveil.	Team
13		0:56–0:59	End card tagline “Speed is security.”	“Cover. Sprint. Persist.” [pause] “Marlin.”	Team
