# Marlin: Speed is security

A 60-second film showing how a sub-24-foot hydrofoil sensor craft, fast and steady in seas that slow other boats, closes the gap between detection and eyes-on for two missions: port security inside the harbor and counter-drug interdiction on the approaches.

ARCHIMEDES

AUDIENCE

Port authorities and federal maritime security stakeholders: homeland security, Coast Guard, customs, counter-drug task forces and defense program offices.

OBJECTIVE

Earn a follow-up demo or test-and-evaluation conversation. One idea to leave with: response time is the gap, and Marlin closes it.

CORE MESSAGE

Two missions, one platform. Detect, close, identify, hand off: hostile craft in the harbor, smugglers on the approaches. Marlin finds and holds; partners make the stop.

TONE & SOUND

Measured and operational, not action-movie. Calm, authoritative VO (~145 words, the most 60s will hold). Low pulse score that lifts at the reveal; real engine and water audio.

STRUCTURE · 60 SECONDS · 11 SHOTS

**Act 1 · The gap**
0:00–0:14 · shots 1–3

**Act 2 · Marlin: harbor mission, then counter-drug mission**
0:14–0:45 · shots 4–8

**Act 3 · The outcome**
0:45–1:00 · shots 9–11

CLEARANCE BEFORE RELEASE

**Speed & sea-state claims.** “Up to 150 knots” and any sea-state rating need trial data, or a caption calling them design targets. Avoid “fastest” or “unmatched” unless the comparison group is defined (e.g. patrol-class craft or USVs) and documented; outright racing boats go far faster.

**Sensors.** Generic iconography only: no models, bands, ranges or detection performance. Export-control (ITAR/EAR) review of the script and final cut.

**Government marks.** No agency seals, uniforms or vessel markings that imply endorsement. Agencies appear only as generic “partner” nodes.

**Footage & figures.** License real port b-roll and get the port's written OK if it is identifiable. Source every figure in the VO before picture lock.

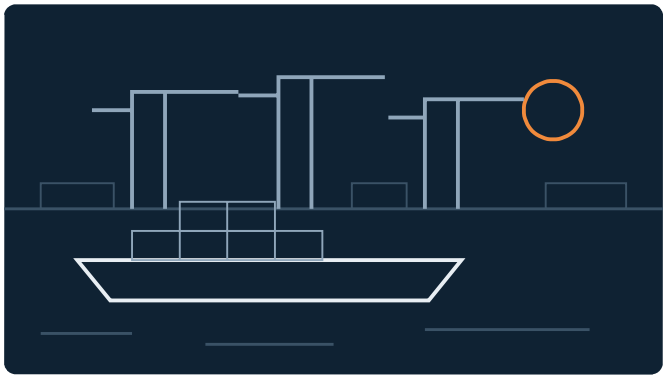

**Law enforcement.** Marlin detects, tracks and cues; a generic, authorized boarding team makes the stop. Don't show Marlin or its operators boarding, detaining or using force, or real smuggling routes and tactics.

**Military framing.** If defense users appear, keep them in detection-and-monitoring roles, DoD's statutory counter-drug lane. Arrests and seizures belong to law enforcement.

ACT 1 · 0:00–0:14

# The gap

Set the stakes fast: ports are critical, threats are small and quick, inside the harbor and on the approaches, and today's response takes too long.

01 · Wide aerial, slow push 0:00–0:05

VISUAL

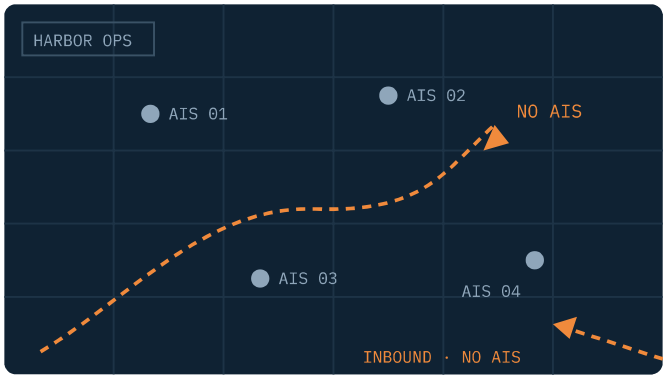

Dawn drone shot over a major U.S. container port. Cranes working, a loaded ship easing to its berth. Calm, busy, and important.

VO

*“Every day, America's ports carry the cargo our economy and our military depend on.”*

ON SCREEN

“Over 80% of global trade by volume moves by sea.” Source line: UNCTAD.

02 · Console insert, then water 0:05–0:10

VISUAL

Port-ops screen: tagged ships sit still while one untagged contact cuts through the harbor and a second runs in from offshore. Match-cut to a low, unlit go-fast at night.

VO

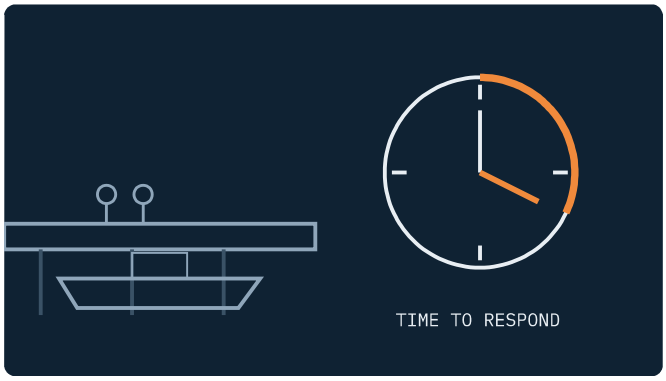

*“The threats are small, fast, and often dark: hostile craft in the harbor, smugglers on the approaches.”*

ON SCREEN

Contact labels only: “NO AIS” and “INBOUND · NO

SOUND

Gulls, distant crane horns. Low synth pulse fades in.

03 · Pier, clock overlay 0:10–0:14

VISUAL

A generic (unmarked) patrol crew boards a conventional boat. A clock graphic sweeps fast while the boat is still at the pier.

VO

*“Conventional patrols take time to respond, and rough water slows them further. Threats don't wait.”*

ON SCREEN

None. Let the clock carry it.

SOUND

Ticking builds, then cuts to silence on the last frame.

AIS”.

SOUND

Console beep; outboard whine passes left to right.

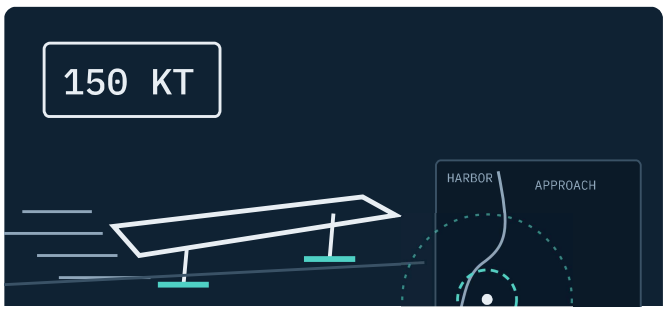

ACT 2 · 0:14–0:45

# Marlin: two missions, one platform

Reveal the hydrofoil, show speed and sea-keeping as reach, then run the same playbook twice: a hostile contact in the harbor, and a smuggling run on the approaches. Marlin finds and holds; partners make the stop.

---

04 · Low-angle reveal 0:14–0:18

VISUAL

Silence breaks. Camera at waterline as Marlin pulls away and rises onto its foils; the hull lifts clear and the spray drops away. Title card lands.

VO

*“Archimedes Freight presents Marlin.”*

ON SCREEN

Archimedes logo (white) · MARLIN

SOUND

Engine spools up; score lifts on the cut.

05 · Tracking shot + reach map 0:18–0:24

VISUAL

Drone alongside at full speed; the hull flies level while the chase boat behind it slams through chop. Speed readout climbs; map inset shows reach growing from the harbor out past the breakwater.

VO

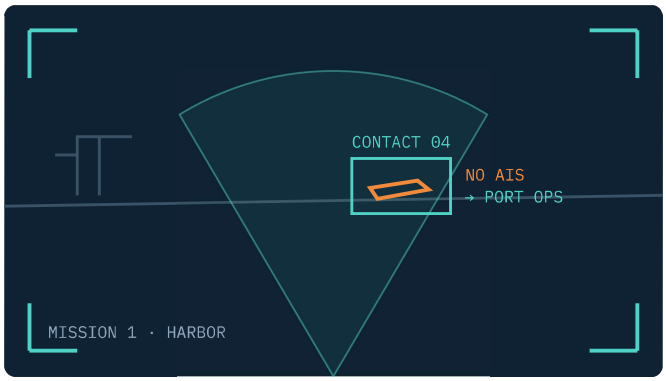

*“Under 24 feet. Flying on foils at up to 150 knots. Harbor to approaches in minutes, even through open-water chop.”*

ON SCREEN

“HYDROFOIL · <24 FT · UP TO 150 KT* · HIGH-SPEED OPS TO SEA STATE 3*”. Footnote: *Design target

SOUND

Full engine roar, wind buffet on the mic.

06 · Mission 1: harbor 0:24–0:32

VISUAL

Daylight, inside the breakwater. Bow-camera POV: a stylized overlay boxes the dark contact from shot 2. Marlin holds a standoff; the feed pops up on the port-ops wall.

VO

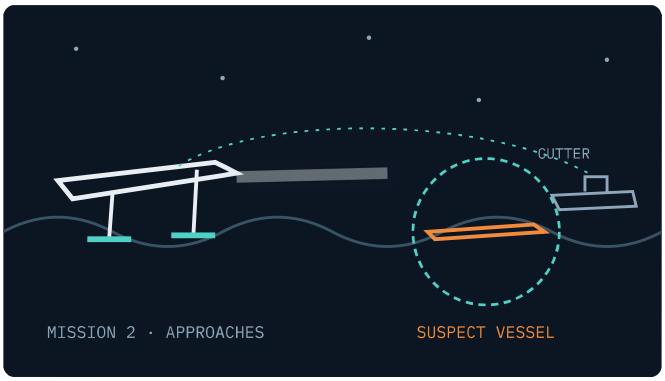

*“In the harbor, its sensors find what fixed cameras miss, and put eyes on it fast.”*

ON SCREEN

Corner tag: MISSION 1 · PORT SECURITY. Overlay labels only; no ranges, bands, or sensor names.

SOUND

Engine ducks under soft UI tones; one lock-on chime.

07 · Mission 2: counter-drug 0:32–0:41

VISUAL

Night, offshore, moderate chop (Sea State 3 or below). A low, unlit go-fast pounds through it toward the coast. Marlin flies level above it, closes, then shadows at standoff while a generic cutter's boarding team approaches.

VO

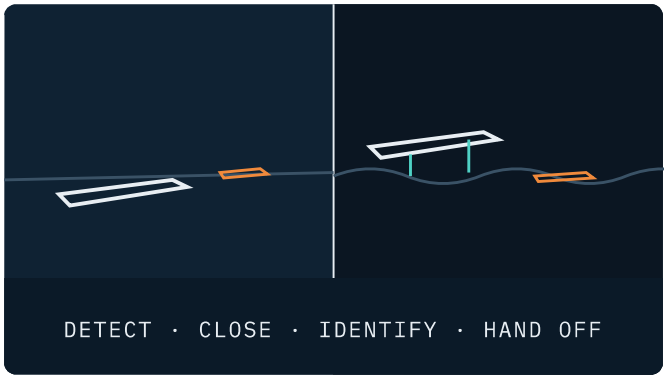

*“Offshore, it flies over the chop that slows smugglers down, and shadows them until a boarding team arrives.”*

ON SCREEN

Corner tag: MISSION 2 · COUNTER-DRUG. No cargo, routes, or seizure footage shown.

SOUND

Wind, hull slap from the go-fast, distant radio chatter (unintelligible).

08 · Split-screen payoff 0:41–0:45

VISUAL

Split screen: harbor by day, approaches by night, the same four beats playing in sync on each side.

VO

*“Detect. Close. Identify. Hand off.”*

ON SCREEN

DETECT · CLOSE · IDENTIFY · HAND OFF (one word per beat)

SOUND

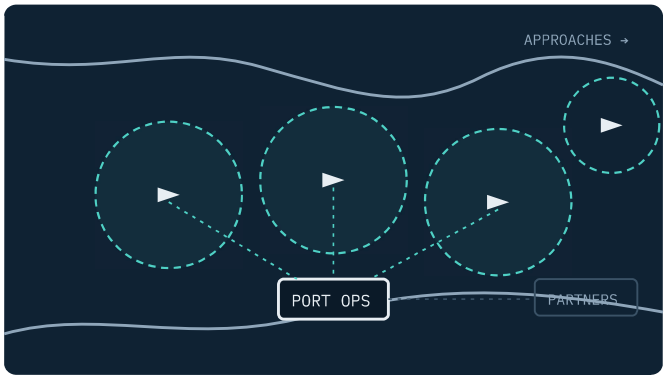

Four hits in the score land on the four words.

ACT 3 · 0:45–1:00

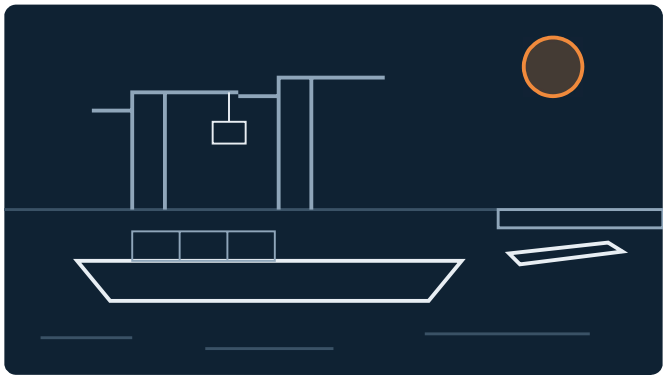

# The outcome

Scale from one craft to a system, return to the calm port from shot 1, and close on a clear next step.

---

09 · Animated map pull-back 0:45–0:51

10 · Callback to shot 1 0:51–0:56

VISUAL

Camera pulls up from the split screen into a stylized map. Marlins hold a picket inside the harbor and out on the approaches; rings link to port ops and partner nodes.

VO

*“As a networked picket, Marlin extends the reach of every partner, from pier to approach.”*

ON SCREEN

Generic nodes: PORT OPS, PARTNERS. No agency seals.

SOUND

Score broadens and resolves; engine fades out.

11 · End card 0:56–1:00

VISUAL

Fade to navy. Logo, product name, tagline, and the CEO contact as the call to action. Hold at least three seconds on the contact lines so the email can be read or photographed.

VO

*“Marlin. Speed is security.”*

ON SCREEN

Archimedes logo (white on navy) · MARLIN · Speed is security. · Gregg Scheiferstein, CEO · gscheiferstein@archimedesfreight.com · small-print disclaimer.

SOUND

Final score hit, then a single engine rev to black.

VISUAL

Same angle as shot 1, now in full morning light. Cranes lifting, ship working. Marlin idles at a pier in the corner of frame.

VO

*“Ports stay open. Cargo keeps moving. Contraband stays out.”*

ON SCREEN

None.

SOUND

Port ambience from shot 1 returns under the score.

Sketches are composition guides, not final art. Placeholders in [brackets] need Archimedes input before production.
